

DSI DANTECH

automatic

liquid filler system

Customizable and automatic robots for filling liquids and fluids in vertical plate freezers. Achieve a uniform and precise filling for optimal utilization and same block sizes, while minimizing the risk of spillage and contamination of products with human contact.

Block freezing facilitates subsequent handling and palletizing of your product. The liquid filler serves up to 5 freezers or the equivalent of 10 pallets of frozen product.

distinguishing

features

- automated precise filling
- capacity 8640l/h, 144l/min
- minimum labor needed
- hygienic and easy to clean
- single string
- minimize time and waste
- pipeline suitable for CIP cleaning
- low energy consumption
- improved ergonomics/working environment
- fast & easy to operate
- minimize spillage and contamination risks
- easy to assemble
- customizable

compatible

products

- juice
- jam
- milk products
- syrup
- soft drinks
- fruit puree
- blood
- and many more
